

DID U KNOW?

HAPPY THANKSGIVING

It is Thanksgiving. Indeed this is when we give thanks for the many wonderful things in our life and those “things” that are bestowed upon us. Even at this time, some of us “geeks” cannot wait to get our hands on the latest technology. One thing that comes to mind is the Smartphone. On the market there are several to choose from—ie. Palm Pre, Apple Iphone and the RIM Blackberry. Each features its own pros and cons which makes anyone a perfect fit depending on the user and their desires. Not only does this particular technology allow us to be even *more* in touch with everyone it also allows us to be more in touch with everything. GPS, Wi-Fi and faster network are considered standard on these smartphones. The Blackberry phones are very popular with business clients who are more willing to text and email users in lieu making a phone call. It definitely has made a mark and captured a niche in the market.

VOLUME 1, ISSUE 4

We strive to make your business, whether great or small, attain your goals.

OUR NEW LOCATION

We have opened a new office at:

1271 Ralph David Abernathy Suite C.

Atlanta, Georgia 30310

The Palm Pre is the latest “Iphone killer” made specifically to compete with the Iphone. It offers the ability to multi-task between different applications on the device. It also takes better quality pictures than the Iphone. Then there is the

Iphone which seemingly has the ability to mold to your needs by the allowing you to download various applications to meet your desire. For example, if you are an avid golfer—you can download apps that would keep you informed of Golf news , types of clubs to visit, and a scorecard to chart your progress with past games. With all the aforementioned

features you cannot go wrong with any Smartphone – it is just a matter of selecting one that will suit your needs. I realize that I may sound bias, but excuse me I have to download a turkey recipe fro dinner tomorrow from **my** Iphone.

Happy Thanksgiving!
